# PRESS RELEASE

The Directors of HilAir wish to advise all members of the public particularly those interested in the Sky Arrow range of aircraft products that the HilAir website ([www.hilair.com.au](http://www.hilair.com.au)) is now back up, running and stable.

## SERVERS HACKED

Recently visitors to the HilAir website looking for information regarding the Sky Arrow would have only found a blank page. In some cases an error message appeared giving the impression that the site did not even exist.

The HilAir website is a hosted site and just prior to Christmas the site host's servers were hacked causing severe disruption to not only the HilAir website but many, many others. Numerous attempts to recover the servers then the website proved frustrating and difficult to stabilise.

## SOLUTION

To overcome the problem HilAir is taking steps to ensure that this does not happen again by shifting the website to a new host while it sets-up its own IT network infrastructure. This first step has now been completed and the site is up, running and stable.

## ADDED VALUE

Geoffrey Hill, a Director for HilAir, is pleased with the introduction of this new infrastructure. *"HilAir has always wanted to establish its own internal IT network plus host its own website and this incident has provided us with the motivation to do it now. Besides the improved website stability the network will add significant value to the way we do business within HilAir."* Hill said.

**HilAir**  
*'For the Fun of Flying'*

## SKY ARROWS

The Sky Arrow is a versatile and attractive proposition for operators seeking to reduce costs while making use of the latest technologies. Also available is the Remotely Assisted Working Aerial System (RAWAS), an integrated on-board multi-purpose four sector system for real time or recorded surveillance, environmental sampling (identified as the Environmental Research Aircraft), mapping and monitoring providing rotary wing performances at a fraction of the cost. To view all of these products and the exciting future visit [www.hilair.com.au](http://www.hilair.com.au).
